

Lecornet.be
The Best cone of the world

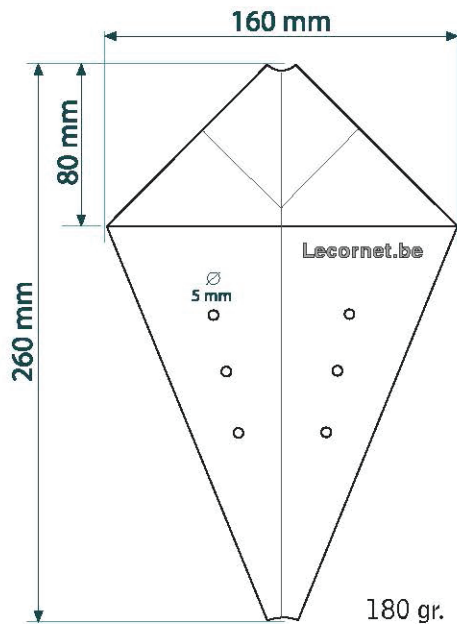

At the last international innovation show "Brussels Innova", which was held in November 2012, our unique airy cornet was awarded by the Gold Medal with honours, by the President of the Jury Award and above all, by the Public Special Award.

Datasheet "Fried Food Airy Cornet" range, T+ Series

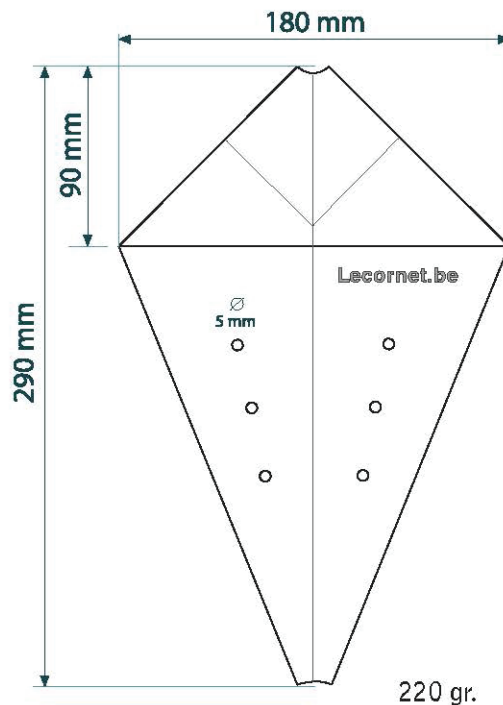

T4+

With 40 gr. sauce cup

T3+

With 50 gr. sauce cup

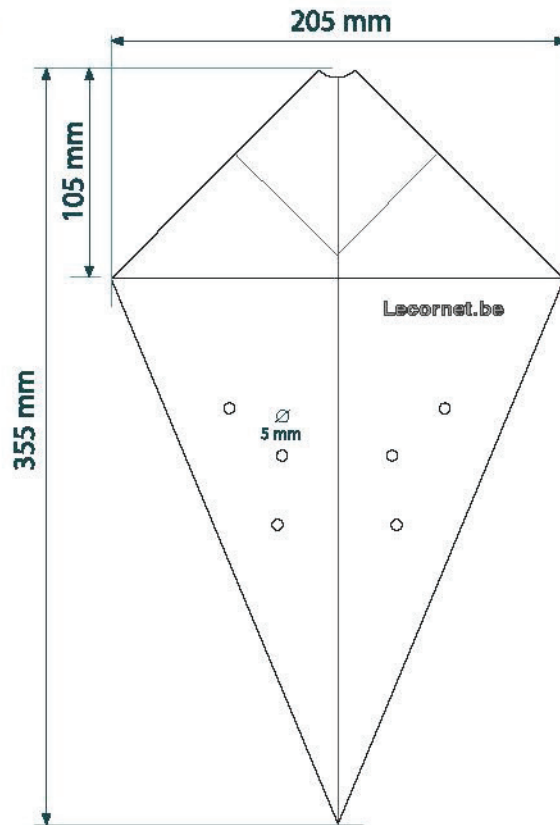

The small holes on each side combined with the cropped base of our cornet generate a flow of air allowing the steam, main cause of the fries softening, to easily escape. Let yourself be overwhelmed by the pleasure of fried and crispy French fries, from the first one to the last one!

This subtle ventilation system does not cool the chips faster than classical cornet.

Order as from 15,000 copies (one pallet)

Datasheet “Churros Airy Cornet” range C+ Series

C3+

With 70 gr. sauce cup

This dedicated Airy Cornet, not cropped at its base, has been specially designed to accommodate the churros and other donuts. By their dedicated form, churos and donuts are not confined at the bottom of the cornet, therefore side's perforations are amply sufficient for correct steam evaporation. On the other hand, it would be a shame to let escape the sugar that decorates these small delicacies.

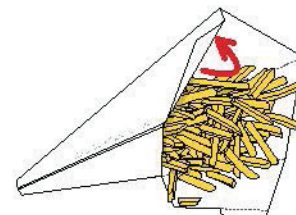

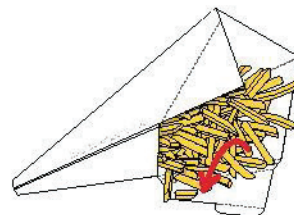

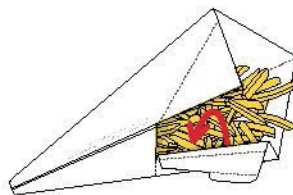

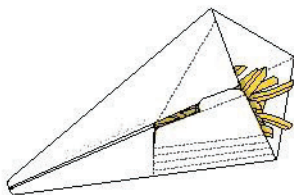

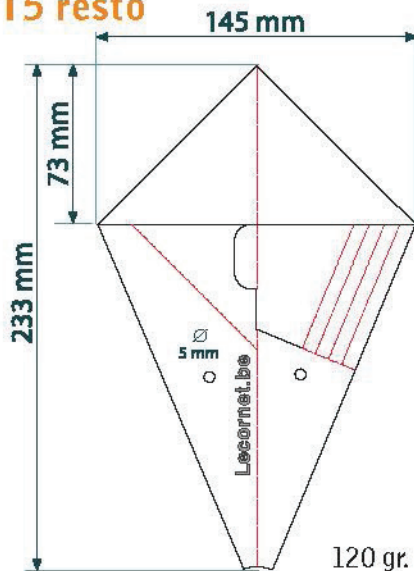

Environment in mind, we have incorporated to the "T+" and "C+" Series a sauce cup, which by its design, offers ease of tasting and hygiene.

Datasheet “Air Cornet T5 Restaurant ” range

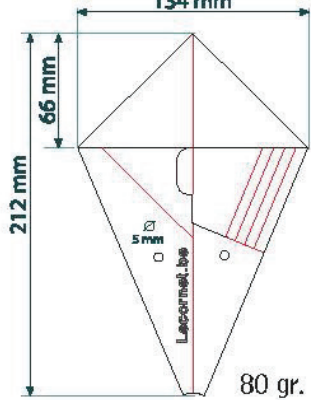

T5 resto

Airy Cornet “T5 resto”, “FF5”, “FF4” and “FF3” have the particularity to offer the traditional way of taste fries but can also be placed on a table and easily open. No more cornet holder required!
